

digits Lesson Download Instructions

1 Download

Download lesson folders to a designated folder on your desktop. This may take a few minutes to complete.

2 Flash Settings

digits lessons require an update to your Flash Player Security Settings.

To make sure these are set correctly, please go to:

http://www.macromedia.com/support/documentation/en/flashplayer/help/settings_manager04.html

This will take you to Flash Player Help, where you can change your Global Security Settings. Once you are there:

- Click on the button that says "Always allow".
- From the dropdown menu below, choose "Add locations".
- Click on the button that says "Browse for folder..." and select the folder into which you have downloaded your *digits* lesson folders.

3 Extract Files

If you are working on a PC, you will need to extract the lesson files from the zip file before viewing them. Look for a link labeled **Extract all files** in your Folder Tasks.

4 View the lesson

Open the file titled **index.html** to launch the lesson table of contents.
